

RURAL LIVING FOR FUTURE URBAN HABITATS AND LIFE STYLES

Sustainable human habitat

3D Innovate works for all those involved with development of the next generation. It includes, media content, community, school, home, people, content, creative, technological, competitions and sponsorship.

KENSRI SCHOOL of Excellence,
the best from an Indian
"Nature Prospective".

This is a theme park cum education institution for children and general population by providing an experience of rural life to develop better life style that would help preserve cities sustainably for human habitat.

Park: Will have huts/cottage to house about 100-200 children or adults at a time. Each hut to house a maximum of 4. The hut will have its own water harvesting and other sustainable programs. No TV, No computer, No radio, No fridge etc. It will have a community kitchen where people can cook their own food.

The participants will learn all known trash re____ techniques.

They will participate in personal interactions which are becoming limited due to social media.

They will participate in limited cultivation of herbs and shrubs. They will be taken on bio-diversity trail.
